CAE Aria

Pediatric Simulator

CAE Aria, our new high-fidelity pediatric medical manikin, adds realism to educational scenarios to better prepare students and practicing professionals for the moments that matter. Training with CAE Aria reduces medical errors, improves performance and enhances pediatric patient care.

Simulating a 7-year-old child, CAE Aria offers interchangeable gender, 60 vocal expressions and sounds, an advanced airway and neurological features, all of which enable students and clinicians to:

- Assess verbal cues, like confusion, anxiety, stress and pain
- Learn airway management skills
- Conduct neurological evaluations
- Train for pediatric emergencies as if they were really happening

In addition, this patient simulator prepares students and professionals for real-world medical scenarios by offering risk-free practice; and supports training for PALS, PEARS and APLS certifications.

Included simulated clinical experiences

- Accidental electrocution
- Accidental overdose
- Burn injury
- Closed head injury
- Diabetic ketoacidosis with hypoxemia
- Envenomation
- Gunshot wound
- Obstructed airway
- Submersion injury
- Trauma with pneumothorax

Lifelike care in any situation

Wireless and tetherless, CAE Aria can be put into realistic and relevant training situations, like a home or ambulance. That means learners stay in the moment, wherever that may be.

Academic programs

Reduce the need for pediatric clinical sites by leveraging CAE Aria's lifelike responses in a risk-free environment

General/children's hospitals

Maintain life saving pediatric certifications by using CAE Aria to refresh the skills and reflexes of nurses, doctors and healthcare professionals

Emergency medical services Learn proper assessment, transport, handoffs and pediatric response

CAE Aria **Technical Specifications**

Manikin

Height: 48" H (121.92 cm) Weight: 50 lbs. (22.68 kg)

Electrical

AC Input: 115/230V 50/60Hz 2 internal batteries: 14.4V, 6.90Ah lithium-ion, rechargeable Manikin battery life: approximately 5 hours

Available in two skin tones:	Me	dium		Dark
------------------------------	----	------	--	------

Standard Equipment

Software-compatible tablet
CAE Maestro instructor-driven software platform (manual mode)
CAE Maestro Standalone software license (1)
1 wireless StethoSym
One year of CAE Express Warranty support and maintenance
Electronic emulated patient monitor software
Electronic user guide
SymDefib external defibrillator box
Optional Equipment

Patient monitor computer	
Additional StethoSym units	
CAE Maestro physiology	
Additional Maestro Standalone licenses	
CAE LearningSpace	

Key Features & Benefits

Airway (assess and manage airway)

······, (
Anatomically accurate oral cavity and realistic airway
Nasotracheal/orotracheal intubation (ET tube)
Retrograde and fiberoptic intubation
Transtracheal jet ventilation
Ariticulation to support head tilt, chin lift, and jaw thrust
Distended abdomen with esophageal intubation
LMA, i-gel® and King insertion
Oral and nasal pharyngeal airway insertion
Bag-valve-mask support and recognition
Surgical/needle cricothyrotomy
Tracheostomy
Abdominal distention with esophageal intubation
Swollen tongue, pharyngeal swelling and laryngospasm to provide challenging intubation
Automatic detection and logging of right main stem
Unilateral chest rise and lung sounds with right main stem
Bronchial occlusion
Variable lung compliance and resistance

Articulation

Neck supports joint articulation with the ability to set for nuchal rigidity (stiff neck)
Realistic joint articulation in neck, shoulders, elbows, hips and knees
Forearm pronation and supination

Cardiac (assess and manage cardiac status)

Chest compression feedback and monitoring compliant with AHA CPR requiremtents.	
Effective chest compressions generate palpable femoral pulses and electrocardiogram (ECG) activity	
Supports ECG montoring using real devices/ECG monitors	
Chest compression depth sensor providing real-time quality feedback and reporting	
Library of over 55 cardiac rhythms	
Software-based 12-lead ECG	

lateral palpable pulses with event detection and logging - Carotid, brachial, radial, femoral, popliteal, dorsalis pedis	
ulse palpation event detection and logging	
ood pressure-dependent pulses	
on-invasive blood pressure with Korotkoff sounds	
ariable pulse strength	
rcumoral cyanosis	
eripheral capillary refill (normal, delayed, or none)	
ngerstick blood glucose testing with real equipment	
astric and Urinary (assess and manage gastrointestinal a enitourinary status; deliver and manage medications and erform catheter and enema insertions)	
terchangeable female and male genitalia	
rinary catheterization with urine output	
rogastric/nasogastric tube (no fluids)	
astrostomy tube (with fluids)	
uppository administration	

identify abnormalities/deficiencies)

SymEyes with pupil reactivity and condition presets
Pain response(verbal) via sternal rub
Convulsions

Respiratory (assess and manage breathing)

copilatory (assess and manage breathing)	
ompliant with 2020 AHA BLS guidelines and 2021 ERC guidelines	
pontaneous breathing with chest rise and fall	
isible chest rise during bag-valve-mask ventilation	
ariable inspiratory/expiratory ratios	
ubsternal retractions	
lechanical ventilation support - Supports asynchronous volume and pressure-controlled ventilati - Supports PEEP (up to 20 cm H2O)	on
entilation measurement	
imulated pulse oximeter	
hest tube placement	
nilateral mid-clavicular needle decompression with etection,automatic resolution, and logging	
utomatic detection, resolution and logging of nid-clavicular needle decompression	
ounds	
uscultation of normal and abnormal heart, lung, and bdominal sounds with volume control	
0+ scripted male/female vocal expressions and sounds	
/ireless voice capability	

for medication delivery) Unilateral anterolateral thigh intramuscular and subcutaneous injection sites Humeral IO (no fluids) and tibial IO (no fluids) Antecubital venipuncture site with flashback

CAE

Pre-ported jugular catheter and dorsum of left hand

Reduce medical errors. Improve performance. Enhance patient care.
